

The Moreno Valley Repeater

January - February 2023

Testing with MVARA & GLAARG

Our first testing session of the year was a big success! We hosted 5 examinees, and they all passed their tests!

Two testers received their Technician license, and three upgraded to their General license. We've already had a few sign up for our next testing date: February 16, 2023.

Club News

A Message from the MVARA Board:

We hope that your 2023 is off to a great start! If you haven't already, please make sure that you have submitted your renewal application. This can be done online at our website (mvara.club) or in person at our next club meeting on February 2nd. The club had a great 2022 and we are looking forward to an even better 2023.

Make sure to check out our new WinLink RMS Server, AB6MV-10, that can be connected to at 145.050. This WinLink server is a great way to send messages to fellow Hams and to family and friends in times of emergencies and when normal internet is not an option. The software can be downloaded at www.winlink.org.

January Birthdays

- 1/6 - David Bell N6DJB

TECH TIP

If your radio supports it, try programming your radio with CHIRP! It is a free open source software for all operating systems. With the proper programming cable, you can program local repeaters into your radio with ease. It can be downloaded from chirp.danplanet.com
